

Enterprise Voice Solutions

Gateway Communications' fully operational, tried and tested carrier class VoIP Infrastructure delivers secure, reliable VoIP solutions via more than 60 interconnected networks and facilities in US, Europe and Africa. We deliver a high quality but cost effective voice solution to the South African commercial market, tailored to each business's specific requirements.

The benefits to your business

- Consistent quality – Fully managed and monitored solution
- Seamless migration – Our solutions are designed to ensure there is no change to the end user experience
- Solutions that work best for your specific business needs
- Cost savings without quality degradation
- Added skills to your support structure – Gateway Communications manage and maintain the provided solution
- Scalable – Your Enterprise Voice Solution is constantly scaled to ensure maximum benefits and highest quality is achieved
- Single Service Provider Solutions – Gateway Communications have designed, provisioned and managed Voice Solutions as a single service provider free of third party suppliers
- Our National and International Voice Services are provisioned to ensure maximum quality and savings are achieved. The processes to manage and monitor these benefits have been designed to ensure continued and increased values are enjoyed by you, our customer

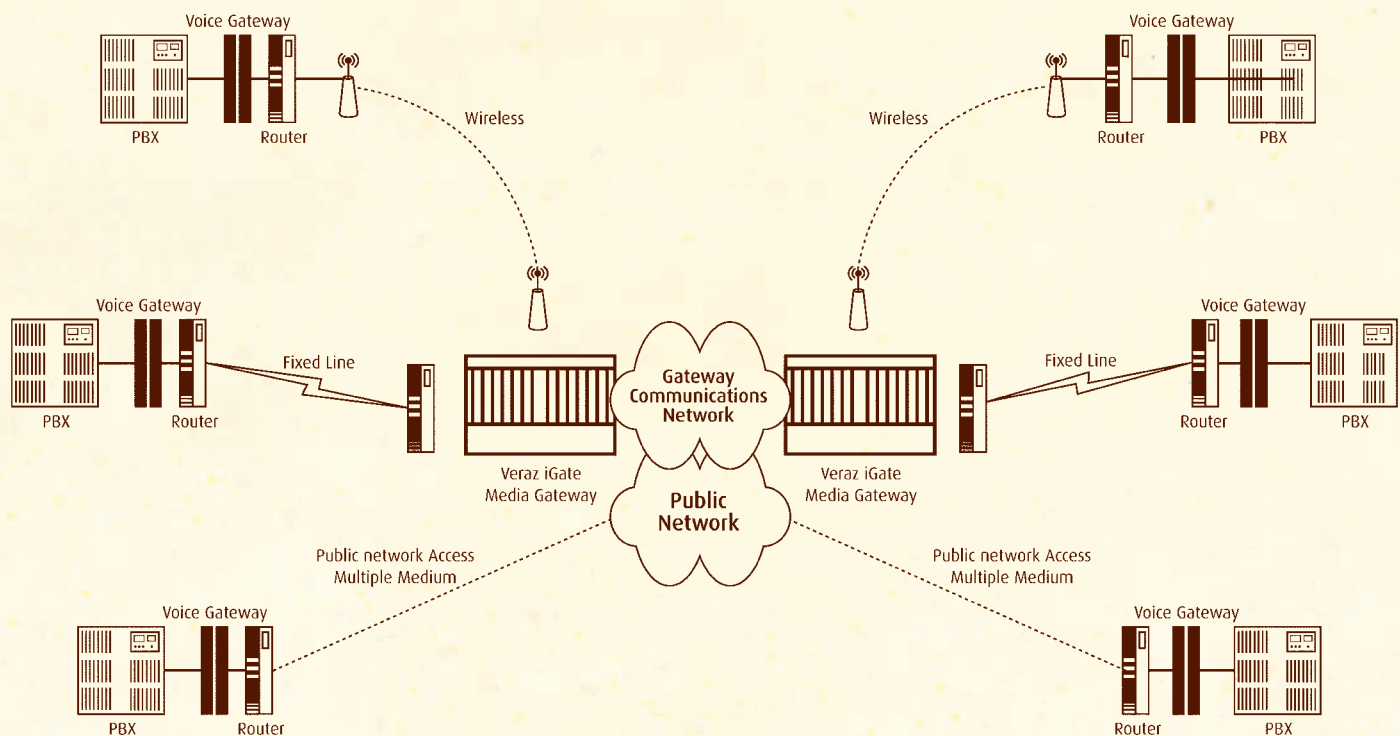

What our service offers

- Business orientated solutions – specific solutions for specific business requirements
- More destinations in Africa directly connected over Gateway's private network
- Accurate and timely billing
- High quality calls and total network integrity.
- Fully redundant deployment
- Live reporting (performance, available minutes, prices) and detailed management information via secure extranet
- An all-IP pan-African next generation network
- Single point of contact for all fault resolutions – talk to the same person from the first to last

- International signaling links to support roaming and international MMS and SMS traffic
- A partner that's dedicated to African communications
