

Satellite Network Solutions

Gateway Communications' integrated network solutions use the latest technologies that enable African mobile operators to rapidly grow coverage and win subscribers whilst ensuring that revenues are matched against infrastructure costs.

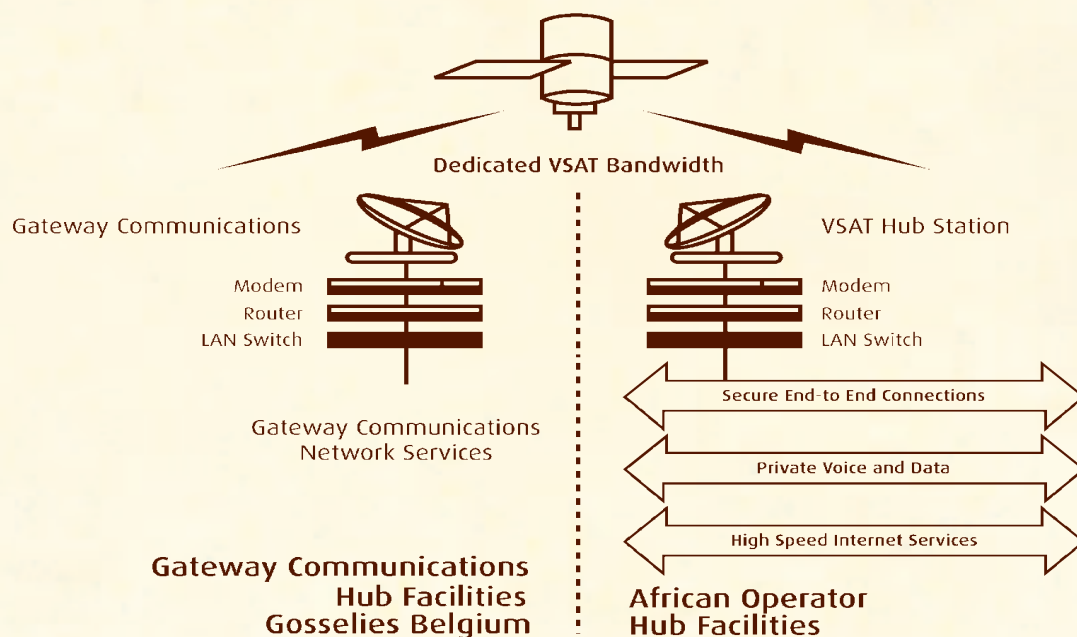

In addition, our professional services will help ensure your deployment is on time, on budget, reliable and of the highest quality.

The benefits to your business

- Access to a dedicated team of satellite network professionals
- Confidence in a team that has delivered satellite networks across Africa
- More coverage in Africa dedicated to cellular operations
- Deep understanding of local market requirements
- Secure and reliable product offering backed up with full SLA's
- The infrastructure in place to support rapid growth - without compromising on quality
- Flexible commercial arrangements that will meet your specific business requirements
- Low network rollout CapEx thanks to use of latest technologies and efficient project management
- Increased ALOC and ARPU

What our service offers

- Domestic and International satellite point-to-point connectivity within Africa using our own dedicated satellite links
- Fully redundant deployment
- Short-term and flexible contracts to match your business growth
- Implementation of the best global technologies in an African context
- Remote network monitoring and management at the application level – we can usually identify faults and offer a solution before you do
- Live reporting (performance, minutes, network availability) and detailed management information via secure extranet
- The right solution for you with flexibility, Service Level Agreements and bandwidth
- Professional services including; procurement and supply chain management, installation management, supervision and training
